

Online Shopping System

- 1- The application will allow customers to select products.
- 2- Every selected item will then be added to the shopping cart.
- 3- Customers can view, modify, and delete the content of their shopping cart at any time.
- 4- The shopping cart number of items and total price are displayed on every page of the online shop.
- 5- Customers can check out at any time but once they check out their order can't be modified, and their order details will be stored in a database.
- 6- The shopping cart content will then be cleared.
- 7- The application will also enable authenticated administrators to manage their shop products online (add, modify, and delete products).
